

Leather Press Edge Roller

Model 60 mm (Medium) - stainless-steel drum - solid-wood handle - leather edge / seam pressing roller

The Leather Press Edge Roller (60 mm, medium) is a hand-operated rolling tool with a polished stainless-steel drum carried on a ball-bearing yoke and a contoured solid-wood handle. Rolled back and forth over a freshly glued joint, it presses two leather faces tightly together, drives out trapped air and excess cement, and leaves a flat, firmly bonded, professional-looking edge. The free-spinning 60 mm face suits medium and larger work — wallets, belts, bags and panels — and the tool is equally useful on vinyl, laminates, bookbinding and quilting seams.

General / Identification

Product	Leather press edge roller (edge creaser / glue-laminating roller)
Roller type	Single-drum hand roller, T-handle
Size class	Medium
Roller face width	60 mm (2.36 in)

Performance / Functional

Function	Presses & flattens glued leather seams and folded edges; expels trapped air and excess cement to tighten the bond
Rolling action	Free-spinning drum for smooth, even travel along the seam
Surface finish	Electroplated, mirror-polished steel face for smooth, non-marking travel

Material & Construction

Roller drum	Stainless steel, electroplated & polished (some production batches use plated high-carbon steel — confirm with supplier)
Yoke / bracket	Steel
Handle	Solid wood (hardwood / beech)

Mechanical & Dimensional

Roller face width	60 mm (2.36 in)
Roller diameter	34 mm (1.33 in)
Handle diameter	27 mm (1.06 in)
Overall height	170 mm (6.69 in)
Net weight	522 g (≈ 1.15 lb) (estimate — confirm against unit)

Environmental & Care

Use environment	Indoor / workshop, dry
Care	Wipe the drum clean and keep dry to prevent rust; ensure the face is lint-free before each use to avoid marking the leather
Storage	Store dry; avoid prolonged damp to protect the steel face and wood handle

Ordering / Packaging

This model	60 mm face, medium size
Family sizes	26 mm (small) / 60 mm (medium) / 100 mm (large)
Retail packing	Individual printed colour box, 170 x 80 x 41 mm

Typical applications

Leathercraft — bonding and smoothing glued seams and folded edges on wallets, belts, bags and straps; also vinyl and PU work, laminating, bookbinding, model-making and quilting seam pressing.

Disclaimer: Figures marked “typical”, “estimate” or “confirm against unit” are series-representative for this class of generic tool and must be verified against the actual item and the supplier’s specification before rated or critical use. As an unbranded OEM product, exact materials, bearing type and weight vary slightly between production batches. Specifications subject to change without notice.
