

XSQ-1B Die Height Indicator — 340-450 mm

Slide-adjustment die-height indicator for mechanical power presses

The XSQ-1B is a die-height (shut-height) indicator for mechanical power presses. It is fitted to the press's slide-adjustment drive and shows the die-height setting across a 340-450 mm range, so the slide can be set accurately during die changes. This variant is fitted to YADON mechanical presses.

General / Identification	
Product type	Die-height (shut-height) indicator
Model	XSQ-1B
Range variant	340-450 mm
Press compatibility	YADON mechanical power presses
Functional	
Function	Indicates the press die-height setting during slide adjustment
Indicated die-height range	340-450 mm

Typical applications: die setting and slide-height adjustment on mechanical C-frame power presses in sheet-metal stamping.
